PROFESSIONAL SUMMARY

Creative and versatile Full-Stack JavaScript Developer with over 7 years of professional experience, combining technical skill and design sensibility to deliver robust, responsive, and user-centric web applications. Specialized in modern frontend frameworks like Angular and Vue, with strong backend experience using AdonisJS. Adept at real-time communication, secure architecture, and clean UI development. Passionate about UI/UX design, with a keen eye for detail and performance. Comfortable taking projects from concept to deployment and eager to contribute to innovative teams and products.

PROFESSIONAL SUMMARY

Software Developer – Devtech, Novi Sad
March 2022 – Present
- Contributed to frontend development on multiple large-scale projects using Angular and Vue
- Specialized in UI consistency, component systems, and responsive design
- Delivered internal training sessions on advanced CSS, encouraging team growth and knowledge sharing

Frontend Developer – Consulteer, Zrenjanin
March 2017 – March 2022
- Progressed from intern to core team member on Angular, WordPress, and Django-based projects
- Took initiative in implementing performant and user-focused Angular applications
- Guided and supported two junior developers on a WordPress project during early career stage

Team Lead – 6thSense Project, TIC 2016
March 2016 – October 2016
- Led development of an industrial embedded monitoring solution selected among top 7 regional entries
- Worked hands-on with sensors, embedded C, and real-time data visualization
- Experience sparked ongoing interest in IoT and microcontroller projects

EDUCATION

Bachelor of Information Technology
(Unfinished – 4 Years Completed)
TF "Mihajlo Pupin", Zrenjanin (2014 – Present, on hold)

Participated in multiple academic and competitive development projects

Construction Technician
Electrical and Construction High School "Nikola Tesla", Zrenjanin
2010 – 2014

TECHNICAL SKILLS

Frontend: HTML5, CSS3, SCSS, Tailwind CSS, Bootstrap, JavaScript, TypeScript, Angular 2+, Vue, AlpineJS, EdgeJS

Backend & Full Stack: AdonisJS (v5), Node.js, Express, REST APIs, WebSockets, Unpoly, Docker, SQLite, MySQL, PostgreSQL

Design & Tools: Figma, Photoshop, Storybook, Webpack, Encore, PostCSS, Git

Other: Google Apps Script, MQTT, WebMIDI, Arduino, p5.js, DigitalOcean, Contabo, Linux, windows, macOs

LANGUAGES

Serbian – Native
English – Fluent

SELECTED PROJECTS

Bandgrid (bandgrid.com)
- Full-stack AdonisJS + Vue application for managing band and venue events
- Features calendar sync (iCal), real-time chat, invite system, real-time Map data using MapboxGL
- Independently designed branding, UI system, and marketing strategy

UI Library for AdonisJS
- Built custom EdgeJS component library styled with TailwindCSS + AlpineJS
- Reusable components: modals, sliders, etc.

Secure Real-Time Chat Application
Personal Project – In Development
- Built with AdonisJS v5, using WebSockets for low-latency communication
- Supports 1-on-1 and group chats
- Implements end-to-end encryption
- Mobile-first UI with real-time updates, and message status
- Future plans include file sharing, and voice/video calls using WebRTC
